IN THE CLAIMS:

- 1. (Currently amended) An isolated peptide which has from 13 to 60 amino acids, and which comprises SEQ ID NO: 1, wherein the isolated peptide possesses trypanolytic activity as determined by a trypanolytic assay.
- 2. (Currently amended) An isolated or recombinant peptide comprising the amino acid sequence of SEQ ID NO: 3 or a fragment thereof having trypanolytic activity <u>as determined by a trypanolytic assay</u>.
 - 3. (Canceled) The isolated peptide of claim 1 exhibiting trypanolytic activity.
- 4. (Withdrawn) An antibody specifically recognizing a peptide selected from the group consisting of a peptide comprising at least 9 contiguous amino acids of SEQ.ID.NO.1, a peptide comprising the amino acid sequence of SEQ.ID.NO.3, a fragment of either thereof, and an epitope of either thereof.
- 5. (Withdrawn) A DNA sequence encoding an Eisenia foetida protein or polypeptide or encoding an immunologically active and/or functional fragment thereof selected from the group consisting of:
- (a) DNA sequences comprising a nucleotide sequence encoding a protein or peptide comprising the amino acid sequence as given in SEQ ID NO. 1 or 3;
 - (b) DNA sequences comprising a nucleotide sequence as given in SEQ ID NO: 2;
 - (c) DNA sequences hybridizing with the complementary strand of a DNA sequence as defined in (a) or (b) and encoding an amino acid sequence which is at least 80% identical to the amino acid sequence encoded by the DNA sequence of (a) or (b);
 - (d) DNA sequences the nucleotide sequence of which is degenerated as a result of the genetic code to a nucleotide sequence of a DNA sequence as defined in any one of (a) to (c); and
 - (e) DNA sequences encoding a fragment of a protein encoded by a DNA sequence of

any one of (a) to (d).

- 6. (Withdrawn) A recombinant expression vector comprising the DNA sequence of claim 5.
- 7. (Withdrawn) A host cell transformed or transfected with an expression vector according to claim 6.
- 8. (Withdrawn) The host cell of claim 7 wherein the host cell is selected from the group consisting of *E. coli, Bacillus sp., Streptomyces sp.*, yeast, fungi, insect cells, plant cells and mammalian cells.
 - 9. (Withdrawn) The host cell of claim 8, wherein the host cell is E. coli.
- 10. (Withdrawn) A process for the production of an *Eisenia foetida* polypeptide or an immunologically active or functional fragment thereof comprising culturing a host cell of claim 7 under conditions allowing the expression and production of said polypeptide and recovering the thus produced polypeptide from the culture.
- 11. (Currently amended) A pharmaceutical composition comprising a peptide selected from the group consisting of: an isolated peptide which has from 13 to 60 amino acids and which comprises SEQ ID NO: 1, wherein the isolated peptide possesses trypanolytic activity as determined by a trypanolytic assay; an isolated or recombinant peptide comprising SEQ ID NO: 3, wherein the isolated or recombinant peptide possesses trypanolytic activity as determined by a trypanolytic assay; a fragment of either thereof having trypanolytic activity as determined by a trypanolytic assay, and an epitope of either thereof.
- 12. (Withdrawn) A method of treating a disease selected from the group of diseases consisting of trypanosomal infection, bacterial infection and cancer, said method comprising: administering a peptide selected from the group of peptides consisting of a peptide

comprising at least 9 contiguous amino acids of SEQ.ID.NO.1, a peptide comprising the amino acid sequence of SEQ.ID.NO.3, a fragment of either thereof, and an epitope of either thereof.

13. (Canceled)

- 14. (Withdrawn) The process according to claim 10, wherein the host cell is selected from the group consisting of *E. coli, Bacillus sp., Streptomyces sp.*, yeast, fungi, insect cells, plant cells, and mammalian cells.
 - 15. (Withdrawn) The process according to claim 14, wherein the host cell is E. coli.
- 16. (Currently amended) The pharmaceutical composition of claim 11, wherein the peptide comprises at least 9 contiguous amino acids of SEQ ID NO: 1, a fragment thereof having trypanolytic activity as determined by a trypanolytic activity, or an epitope thereof.
- 17. (Currently amended) The pharmaceutical composition of claim 11, wherein the peptide is the amino acid sequence of SEQ ID NO: 3, a fragment thereof having trypanolytic activity as determined by a trypanolytic assay, or an epitope thereof.
- 18. (Withdrawn) The method according to claim 12 wherein the peptide comprises at least 9 contiguous amino acids of SEQ.ID.NO.1 a fragment thereof, or an epitope thereof.
- 19. (Withdrawn) The method according to claim 12 wherein the peptide comprises the amino acid sequence of SEQ.ID.NO.3, a fragment thereof, or an epitope thereof.
- 20. (Currently amended) An isolated or recombinant peptide having a sequence selected from the group consisting of SEQ ID NO: 1, an amino acid sequence which has from 13 to 60 amino acids and which comprises SEQ ID NO: 1, a recombinant amino acid sequence comprising SEQ ID NO: 3, and a fragment of the recombinant amino acid sequence comprising SEQ ID NO: 3 having trypanolytic activity as determined by a trypanolytic assay.

- 21. (Previously presented) An isolated peptide consisting of SEQ ID NO: 1.
- 22. (Previously presented) An isolated or recombinant peptide consisting of SEQ ID NO: 3.
- 23. (New) An isolated peptide consisting essentially of SEQ ID NO: 1, wherein the isolated peptide possesses trypanolytic activity as determined by a trypanolytic assay.
- 24. (New) An isolated or recombinant peptide consisting essentially of SEQ ID NO: 3 or a functional fragment thereof, wherein the isolated or recombinant peptide or functional fragment thereof possesses trypanolytic activity as determined by a trypanolytic assay.
- 25. (New) A method for producing a peptide, the method comprising: producing a peptide consisting essentially of SEQ ID NO: 1, wherein the peptide exhibits trypanolytic activity as determined by a trypanolytic assay
- 26. (New) The method according to claim 25, wherein producing the peptide comprises expressing a nucleic acid encoding the peptide consisting essentially of SEQ ID NO: 1.
- 27. (New) The method according to claim 26, wherein the peptide comprises SEQ ID NO: 3.
- 28. (New) The method according to claim 25, wherein producing the peptide consisting essentially of SEQ ID NO: 1 comprises shortening a full length CCF-1 protein.
